EADO Certification: Medical Tumor Therapy in Dermato-Oncology

The advanced continuing medical education training in "Medical Tumor Therapy in Dermato-Oncology" is intended as an addition to the specialist dermatologist's competence, and covers the administration and monitoring of medical therapy of patients with malignant skin tumors, including supportive measures and management of complications and side-effects from therapy.

The professional competence in systemic therapy for skin cancers obtained after completing the required training period will be certified by the **European Certificate for Medical Tumor Therapy in Dermato-Oncology** awarded by EADO in collaboration with UEMS.

PREREQUISITES FOR CANDIDATES TO CERTIFICATION

- Certification of specialist in dermatology by the relevant national authority (Board Certification) *OR* status of resident in dermatology in the final year of training
- Completion of the training in systemic dermato-oncologic therapy
- Attendance of at least one ESDO course
- Examination by the EADO Board for Certification in Dermato-Oncology

COMMITTEE FOR CERTIFICATION IN MEDICAL TUMOR THERAPY IN DERMATO-ONCOLOGY

Petr Arenberger (Czech Republic)
Ana-Maria Forsea (Romania)
Lidija Kandolf-Sekulovic (Serbia)
Josep Malvehy (Spain)
